To Our Market Garden Friends:

We take pleasure in sending to you our new Market Garden Catalogue. We do not compete with and are not dealing in cheap, poorly grown Stocks, but aim to supply only Seeds of known purity, produced by careful selection and painstaking care from pedigreed Seed Stock, believing that our seeds are our best advertisement.

This list Cancels All Previous Offers.

DAYS: In listing the number of days from planting to marketable condition, we have used the average results secured over a period of years. These figures apply to planting under normal conditions, and will vary somewhat in different sections of the country, but the number of days indicated will serve to show the relative maturity of the different varieties.

All goods in this Catalogue are offered subject to being unsold on receipt of order and the prices are subject to change without notice.

TERMS:

Bills rendered to regular customers or parties of approved credit from January 1st up to June 1st are due on July 1st. After June 1st all goods are sold on thirty day basis.

When cash accompanies order. 5% discount may be deducted from catalogue prices on seeds only.

DISCLAIMER

TETHER SEED CO., Inc. warrants to the extent of the purchase price that seeds sold are as described on the container within recognized tolerances. We give no other or further warranty, express or implied.

STRING BEANS

DWARF GREEN PODDED VARIETIES

1 lb will plant 100 ft. row; 1 bus. 60 lbs. per acre.

	1 lb.	10 lbs.	1 bus. 60 lbs.
Black Valentine (stringless)	\$.50	\$4.00	\$18.00
Large pods about 6 inches long, slender nearly round and almost straight; stringless and fine-grained, dark green in color. Seed black. An early and productive variety. 50 days.			
Bountiful50	4.25	19.25
The best flat-podded stringless variety for market. Pods 6 1/2 to 7 inches long thick flat and slightly curved stringless and of fine quality; color light green. Very early vigorous hardy and productive. 48 days.			
Plentiful60	4.50	20.00
Primarily a black-seeded Bountiful. Plant strong and productive. Pods flat, long, fairly straight, medium green, brittle and stringless. 50 days.			
Streamliner70	5.25	25.25
Plant of medium size and prolific. Pods 7 1/2 inches long, straight oval, medium green, somewhat fibrous of fair quality. Seed white and small. 50 days.			
Tendergreen65	4.75	21.75
Plants erect, vigorous and very productive. Pods 6 inches long, round, straight, stringless and of fine quality. Excellent for canning or freezing. 54 days.			

DWARF BUTTER OR WAX PODDED VARIETIES

	1 lb.	10 lbs.	1 bus. 60 lbs.
Sure Crop Wax	\$.60	\$4.50	\$20.75
Plant large, sturdy, very productive. Pods 6 inches long, deep yellow, wide, thick, flat, stringless; fine texture and quality. Also called Bountiful Wax. 53 days.			
Pencil Pod Black Wax60	4.50	20.75
Plant large, stocky and vigorous. Pods 7 inches long, round, nearly straight, entirely stringless, without fiber, fleshy and brittle. Clear yellow. 55 days.			

POLE OR RUNNING BEANS

	1 lb.	10 lbs.	1 bus. 60 lbs.
Kentucky Wonder or Old Homestead	\$.75	\$5.50	\$26.75
The most popular green podded climbing variety early and productive. Pods 8 to 9 inches long, nearly round, slender, decidedly curved, tender and good quality. 65 days.			

LIMA BEANS

DWARF OR BUSH VARIETIES

1 lb. will plant 100 ft. row; 3/4 bus. 45 lbs. per acre

	1 lb.	10 lbs.	1 bus. 60 lbs.
Burpee's Improved Bush	\$.65	\$4.75	\$21.75
Plant large, vigorous and productive. Pods in clusters of 5 or 6, averaging 4 beans each. Seeds large, plump, flat-oval, white with greenish tinge. 75 days.			
Fordhook Bush 24265	4.75	21.75
Plant large and productive. Pods slightly curved, containing 3 to 4 large thick-oval, light green beans. Yields well under high temperature conditions. 75 days.			

POLE VARIETIES

1 lb. will plant 100 hills; 1/2 bus. 30 lbs. per acre.

	1 lb.	10 lbs.	1 bus. 60 lbs.
Dreer's Improved or Challenger	\$.80	\$6.00	\$29.00
Plants very vigorous, hardy, late and productive. Pods about 3 1/2 inches long, containing 4 to 5 very thick, medium-sized, light green beans of excellent quality. Also known as Potato Lima. 92 days.			
Early Leviathan80	6.00	29.00
A very early large podded variety. Pods 5 to 6 inches long, containing 5 to 6 large, flat, white beans. 90 days.			
Giant Podded80	6.00	29.00
The largest podded Lima in cultivation; extremely vigorous in growth with dark green foliage and pods; midseason. Pods about 7 inches long, 1 1/2 inches broad and are borne in clusters of 6 to 8; beans extra large and of excellent quality. 90 days.			

BEETS

TABLE VARIETIES

1 oz. will plant 50 ft. row; 6 to 8 lbs per acre.

	1 oz.	1/4 lb.	1 lb.	10 lbs.
Detroit Dark Red	\$.15	\$.40	\$1.25	\$10.00
The best late all around beet. Tops are large. Roots are globe shape, very smooth and small tap root. Skin dark red flesh intense deep red without zones. Very tender and sweet. 60 days.				
Short Top Detroit15	.40	1.25	10.00
A strain similar to Detroit Dark Red, but with distinctly shorter tops, roots extremely uniform and more spherical. Color deep blood red. An excellent strain for canning. 60 days.				
Early Wonder Tall Green Top15	.45	1.50	12.50
Tops tall, erect, green, uniform in size and color, bunching attractively for market. Roots round when young, flattened globe later, deep red, smooth with small tap root. Flesh deep dark red, tender and of excellent quality. 57 days.				

SWISS CHARD

1 oz. will plant 75 ft. row; 8 lbs per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.	10 lbs.
Fordhook Giant	\$.15	\$.40	\$1.25	\$10.00
Decidedly the best of the Chards. Leaves broad, upright in growth, very dark green, crumpled or savoyed with broad white mid-rib. 60 days.				
Dark Green Smooth Leaf15	.40	1.25	10.00
Leaves are smooth, dark glossy green. Stems and midribs are white, very broad and comparatively thick. 60 days.				

MANGEL WURZEL AND SUGAR BEETS

1 oz. will plant 75 ft. row; 6 lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.	5 lbs.
Giant Yellow Sludstrup	\$.15	\$.35	\$1.00	\$ 4.50
Long, reddish-yellow ovoid roots, growing half above ground. Flesh white tinged yellow. 110 days.				
Leviathan Long Red15	.35	1.00	4.50
Roots nearly cylindrical, light red, growing well above ground; flesh white and rose-colored. Enormous size. 110 days.				

BROCCOLI

1 oz. will produce 1500 to 2000 plants

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Italian Green Calabrese	\$.50	\$1.50	\$ 5.00
Plant forms a large solid central head; when cut sprouts develop from the leaf axis. Each sprout terminates in smaller green heads which are bunched for market. First heads are marketable in 70 days after seeding. Transplanting delays cutting about one week.			
Raab20	.60	2.00
Early spring, rapid growing annual producing a liberal cutting of leaves and tender flower shoots, used as greens. Shoots to seed rapidly and should be cut before they come into flower. Plant 12 to 15 inches high.			

BRUSSEL SPROUTS

1 oz. will produce 1500 to 2000 plants

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Long Island Improved	\$1.00	\$3.00	\$10.00
The best and most dependable variety. Plant early and compact, producing many solid, round sprouts of good quality. 90 days.			

CABBAGE

1 oz. will produce 2000 plants. 1/4 bs. per acre.

The days indicated are the average required to produce marketable heads from the date of setting young plants in the field. Allow from 30 to 35 days to grow plants.

YELLOWS RESISTANT VARIETIES

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Wisconsin Copenhagen	\$.75	\$2.25	\$ 7.50
69 days. Heads 4 to 6 pounds, very compact, almost round, very uniform in maturity and size. Plants blue-green foliage. 10 to 12 inches tall, short stem.			
Resistant Golden Acre75	2.25	7.50
65 days. Produces small, erect compact plants of blue-green color. The globular, solid heads are about six inches in diameter. The earliest round-head yellows resistant variety.			
Racine Market75	2.25	7.50
68 days. Plant compact, short stemmed, upright distinct blue-green leaves with erect growth. Round, solid heads, about 6 1/2 inches in diameter. A yellow resistant Early Copenhagen Market type.			
Marion Market75	2.25	7.50
75 days. Plant medium stemmed with blue-green foliage. Heads 6 to 7 inches in diameter, round and firm. A yellows resistant Copenhagen Market, somewhat slower developing and larger headed. A heavy yielding second early variety for market or kraut.			
Improved Globe75	2.25	7.50
80 days. A yellows resistant improved strain of Glory of Enkhui-zen. Plant large, vigorous, medium green. Head 7 to 8 inches in diameter, compact and globular.			
Wisconsin All Seasons75	2.25	7.50
90 days. A yellows resistant strain of All Seasons. Plant large, upright, with dark blue-green leaves. Heads 10 to 12 inches across, 8 inches deep, weigh 9 to 10 pounds large and flat with a rounded top. Does not crack easily. Excellent for kraut.			
Wisconsin Hollander No. 875	2.25	7.50
100 days. Plant upright, blue-green leaves, a vigorous grower. Head 7 to 8 inches in diameter, 7 to 9 pounds, globular to flattened globe, very firm. Excellent quality and heavy yielder.			
Bugner75	2.25	7.50
110 days. A vigorous growing late maturing variety yielding large tonnage per acre. Medium stemmed, large spreading plant with deep blue-green leaves. Head 8 inches in diameter. 8 to 10 pounds, deep globe and flattened on top.			

STANDARD EARLY VARIETIES

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Golden Acre	\$.50	\$1.50	\$ 5.00
64 days. Plant small and compact allowing close setting, short stemmed with small, cup-shaped leaves. Head uniformly round, firm, 6 to 7 inches in diameter, weighing 3 to 3 1/2 pounds. Earliest and most popular of the round headed varieties.			
Early Jersey Wakefield50	1.50	5.00
62 days. Plant small, compact with medium green leaves. Head conical, usually 7 inches deep, 5 inches near base, weigh 2 to 2 1/2 pounds, greenish white interior and fairly solid.			
Copenhagen Market50	1.50	5.00
66 days. Plant erect, compact short-stemmed few outer leaves, medium light green. Head uniformly round, solid, 6 to 7 inches in diameter, weighing 3 to 4 pounds.			

Cabbage continued next page

CABBAGE

1 oz. will produce 2000 plants. 1/4 lbs. per acre.

INTERMEDIATE VARIETIES

	1 oz.	¼ lb.	1 lb.
Early Flat Dutch	\$.50	\$1.50	\$ 5.00
90 days. Plant dark, blue-green leaves, vigorous and spreading. Head 10 to 11 inches in diameter, 6 1/2 inches deep, weighing 10 pounds, large flat and deep with firm interior.			
Glory of Enkhuizen50	1.50	5.00
76 days. Plant medium, short stemmed, fairly compact, yellow-green leaves. Head 7 to 8 inches diameter, 6 to 8 pounds, flattened-globe and solid. Valuable for kraut.			

LATE OR WINTER VARIETIES

	1 oz.	¼ lb.	1 lb.
Danish Ball Head, Short Stem	\$.50	\$1.50	\$ 5.00
100 days. Plant short-stemmed, medium large, blue-green color. Head 8 inches in diameter, weigh 5 to 7 pounds, flattened-globe shape with a short core. Very firm and solid of splendid quality and excellent keeper.			
Penn. State Ball Head50	1.50	5.00
100 days. Plant medium large, short stemmed, blue-green leaves. Heads attractive, flattened globe-shaped, 8 to 9 inches across, 6 to 7 inches deep, weigh 7 to 9 pounds, very solid with a creamy-white interior. One of the most uniform types, excellent keeping qualities and yields high tonnage per acre.			
Late Flat Dutch50	1.50	5.00
100 days. Plant large, short stemmed, spreading, medium green leaves. Head large, 12 to 14 inches across, 7 inches deep, 10 to 12 pounds. Hardy and dependable for heavy tonnage.			

RED CABBAGE

	1 oz.	¼ lb.	1 lb.
Red Acre	\$.80	\$2.40	\$ 8.00
74 days. The earliest red variety. Plant small, compact, short stemmed. Head medium size, round, hard, deep red, uniform in shape and color.			
Mammoth Rock Red60	1.75	6.00
100 days. Plant large, purplish-red with partly spreading habit. Head round to slightly flattened globe, 8 inches in diameter, about 7 pounds in weight and very solid.			
Resistant Red Hollander80	2.40	8.00
100 days. A yellow resistant red variety. Head purple-red 7 inches in diameter, weighing 6 pounds, round to globe shape, solid. Matures fast permitting early cutting.			

Cabbage continued next page

CABBAGE

1 oz. will produce 2000 plants. 1/4 lbs. per acre.

SAVOY CABBAGE

	1 oz.	1/4 lb.	1 lb.
Chieftain	\$.75	\$2.25	\$ 7.50
88 days. Plant medium size, short stemmed, compact, dark green savoyed leaves. Head medium large, drumhead type, thick, flat rounded on top, flat at base, firm and well folded. Stands long time without bursting. Very uniform and the best of the savoy types.			

CHINESE OR CELERY CABBAGE

	1 oz.	1/4 lb.	1 lb.
Michihli—Improved Strain	\$.50	\$1.50	\$ 5.00
70 days. The earliest and most sure heading variety. Head 18 to 20 inches tall, 3 1/2 to 4 inches thick, tapered at the tip. very firm, well blanched, crisp, tender and sweet. So far the best market garden strain.			

CARROT

1 oz. will plant 300 ft. row; 4 lbs per acre.

	1 oz.	1/4 lb.	1 lb.	10 lbs.
Chantenay, Long Type	\$.20	\$.60	\$2.00	\$17.50
70 days. Tops 15 to 20 inches tall. Roots 8 inches long, 2 inches wide at the shoulder, tapered and stump-rooted at maturity, deep orange with indistinct core. Suitable for bunching or bushel use.				
Chantenay, Red Cored20	.60	2.00	17.50
70 days. Tops 15 to 20 inches tall. Roots deep reddish-orange 5 1/2 to 6 inches long. 2 1/4 inches thick at the shoulder, tapered, stump-rooted. Core and flesh nearly the same color. Flesh fine-grained and tender. Excellent for canning and freezing.				
Danvers Special Red Cored20	.60	2.00	17.50
75 days. Tops 16 to 20 inches tall. Roots 7 to 9 inches long, 2 inches thick at the shoulder, smooth and tapered to a blunt end. Color bright orange-red with core of very similar color, tender and fine quality. Excellent for bunching or busheling.				
Scarlet Nantes or Coreless20	.60	2.00	17.50
68 days. Tops are short and small. Roots bright orange 6 to 7 inches long, 1 1/4 inches thick, cylindrical, stump-rooted. Flesh bright reddish orange, crisp and tender. Core inconspicuous thus termed "coreless." Excellent muckland carrot for busheling or bagging.				
Hutchinson20	.60	2.00	17.50
80 days. Top medium large. Roots about 10 inches long, 2 inches thick and nearly cylindrical. Color light orange-red. Very popular with New England gardeners. Used for bunching or busheling.				
Imperator20	.60	2.00	17.50
77 days. Tops medium, abundant, strong enough for good bunching. Roots 8 inches long, 1 1/2 inches at the rounded shoulder, smooth, uniformly tapered to a semi-blunt end. Flesh rich orange color, extending to center of root, fine-grained, tender and excellent quality. Chiefly used for bunching.				
Morses or California Bunching20	.60	2.00	17.50
77 days. Tops medium short and strong; foliage rather coarsely cut. Roots at maturity 1 1/4 to 1 1/2 by 8 inches in size, almost cylindrical with round shoulder, well stumped. Color rich orange throughout. Excellent bunching carrot for shipping.				

CAULIFLOWER

1 oz. will produce 2000 plants. 1/4 lbs. per acre.

The number of days indicated are the average required to produce heads from the date the young plants are set in the field. Usually it is 30 to 35 days from the time seed is sown until the young plants are ready for the open field.

	1/4 oz.	1 oz.	1/4 lb.	1 lb.
Early Snowball No. 50	\$1.00	\$3.50	\$12.00	\$40.00
55 days. Plants of medium height. Foliage medium green and more than ample to cover the head. Heads are of good depth, heavy, ivory white, with a tight attractive curd, of fine quality. Early and maturing somewhat uneven, giving a longer marketing period. Excellent for early spring frame or field growing.				
Late Snowball No. 60	1.00	3.50	12.00	40.00
60 days. The most satisfactory strain for main crop for fall harvest. The plants are large and erect with ample medium bright green foilage to cover the heads. The heads are large, smooth, very deep, solid and pure white. Excellent quality. Harvest not concentrated.				

CELERY

1 oz. will produce 10000; 1/4 lb. per acre.

The number of days given for maturity are those normally required from time of setting plants in the field to earliest harvesting.

YELLOW OR GOLDEN VARIETIES

	1 oz.	1/4 lb.	1 lb.
Dreyer's Special	\$2.00	\$5.50	\$20.00
About 10 days later than our Golden Prize, but has a very heavy rib which is a trifle shorter, and a large golden heart. This strain will produce 10 percent more crates per acre because of its heavy shoulder and compact stalk which is unsurpassed by any other Celery on the market. 85 days.			
Golden Prize	2.00	5.50	20.00
An improvement of the Golden Plume types. The plant has a long first joint, large heart, and is a fast grower making a very desirable strain for an extra early crop, either under glass or in the field. About an 80-day celery.			
Golden Plume or Wonderful	1.25	3.50	12.00
Plants normally 24 to 26 inches tall with stems 7 1/2 to 8 1/2 inches long, fairly heavy, compact and full hearted. About 85 days.			
Cornell No. 19	2.00	5.50	20.00
Developed and introduced by the New York College of Agriculture. A cross between Golden Self-Branching and Utah. Plants 24 to 25 inches tall, 10 1/2 to 11 first joint. Hearts long and comparatively full. Stems thick, rounded and smooth texture. Highly resistant to fusarium yellows. This variety should not be planted nor set in the field too early in the Spring as it appears to go to seed very readily if checked by Spring frost or cold weather. Also known as Yellow or Ivory Pascal. About 100 days.			
New Jersey Special	2.50	6.75	25.00
A tall strain of Golden Plume, the seed of which is produced in New Jersey. The plants are tall and large, having a long first joint and large full heart. An excellent strain for Howard crates. About 85 days.			

CELERY

1 oz. will produce 10000 plants; 1/4 lb. per acre

GREEN VARIETIES

	1 oz.	1/4 lb.	1 lb.
California Pascal	\$2.00	\$5.50	\$20.00

An outstanding strain of green celery. Plants are 26 to 28 inches, medium dark green, erect and compact. Stems are 8 to 10 inches long, rounded, thick, waxy in appearance, blanches readily, tender, crisp and of excellent quality. 120 days.

Pennsylvania or Summer Pascal	2.00	5.50	20.00
--	-------------	-------------	--------------

A most desirable, green variety of excellent quality. Plants medium height, stocky and compact. Stems are very thick, solid and full rounded; blanches a yellowish-white with a pronounced glazed smooth surface, without stringy ridges; very brittle and of a fine nutty flavor. 120 days.

Giant Pascal	1.00	3.00	10.00
---------------------------	-------------	-------------	--------------

A tall, late vigorous, green sort. Stalks round, thick and solid. Blanches yellowish-white. 140 days.

CELERIAC

1 oz. will produce 10,000 plants

	1 oz.	1/4 lb.	1 lb.
Large Smooth Prague	\$.75	\$2.25	\$ 7.50

Turnip-rooted celery. Roots 3 to 4 inches in diameter; globular; fairly smooth; stalks hollow and dark green.

COLLARDS

1 oz. will plant 100 feet of drill.

	1 oz.	1/4 lb.	1 lb.	10 lbs.
Georgia	\$.15	\$.40	\$1.25	\$10.00

A leafy, non-heading plant of the cabbage family grown for greens. Plant 2 to 3 ft. tall, erect and spreading, produces blue-green crumpled leaves under adverse conditions of heat and poor soil. 75 to 80 days.

CORN SALAD

1 lb. will plant 150 hills, 12 to 15 lbs. per acre.

	1 oz.	1/4 lb.	1 lb.
Large Seeded	\$.20	\$.60	\$ 2.00

A thrifty, large growing sort producing rounded, thick, medium grey-green, tender leaves that grow in the form of a rosette. 45 days.

SWEET CORN

During the past few years, vast improvements have been made by many state Experiment Stations and Seed Breeders in the methods of developing sweet corn seed. Through the crossing of various inbreds to produce hybrids, and the top crossing of inbreds on open-pollinated stocks, there have been developed many new and improved strains which are more uniform in maturity and yield much heavier than standard sorts. These strains are highly resistant to bacterial wilt or Stewart's disease.

HYBRID VARIETIES

	1 lb.	10 lb.	100 lb.
Marcross C 6-13	\$.70	\$5.50	\$45.00
A first, good hybrid for early market. Stalks about 5 feet, sturdy and highly resistant to wilt. Ears 7 inches long, plump, abruptly tapered at tips; 10 to 14 rowed, with light cream-yellow, medium broad kernels of good quality. Matures in 72 days.			
Golden Hummer70	6.00	50.00
Large attractive ears about 8 inches long with 12 even rows of tender sweet kernels. Has high yield and uniform plant growth. Seed treated to withstand cold wet weather. Matures in 74 days.			
Carmel Cross70	5.50	45.00
An early midseason type for market use. Ears 6 1/2 to 7 inches long, 10 to 14 rowed, golden yellow kernels. Quality better than Marcross C6-13, but not quite as good as Golden Cross Bantam. Plants 5 to 5 1/2 feet high, sturdy. Matures in 75 days.			
Spancross P 3970	5.50	45.00
A top cross of Spanish Gold and inbred Purdue 39. Stalks 6 to 6 1/2 feet with well tipped ears of 10 to 12 rows, 6 1/2 to 7 1/2 inches long; kernels golden yellow, sweet, tender and of good quality. Highly resistant to wilt. Matures in 78 days.			
Lincoln70	5.50	45.00
Developed by the Connecticut Agricultural Experiment Station. Vigorous well-foiled, 6 1/2 foot plants. Ears 7 1/2 inches long 2 inches in diameter, 12 to 16 rows, tapered to tip, bright yellow broad, kernels of good quality. Matures in 82 days.			
Whipcross P 3870	5.50	45.00
Stalk sturdy with strong foilage; highly resistant to Stewart's disease; ears 7 1/2 inches long, 12 to 14 rowed, well filled at tip; very prolific. Matures in about 84 days.			
Golden Cross Bantam70	5.50	45.00
The ears are light yellow, 10 to 14 rowed, 7 1/2 to 8 inches long; they are very uniform and mature practically all at one time, in about 85 days. It yields very heavy and being a hybrid makes a heavy, uniform growth, large dark green leaves, with sturdy stalks. 6 feet in height. It is resistant to wilt and the tightly wrapped husks resist earworms. Matures in about 85 days.			
Lee70	5.50	45.00
Plants 7 to 7 1/2 feet tall, wilt resistant and somewhat drought tolerant. Ears 7 to 7 1/2 inches long, slightly tapering, small deep kernels of fine eating quality. Matures in 85 days.			
Ioana70	5.50	45.00
Originated by Iowa State College. Highly resistant to wilt. Stalks 6 1/2 to 7 feet high, sturdy and dark green foilage. Ears 12 to 16 rowed, 8 inches long, cylindrical; well filled with medium-narrow, yellow kernels. Matures in 87 days.			
Aristogold Bantam Evergreen70	6.00	50.00
Easy to grow and stands hot dry weather. Ears 9 to 10 inches long with 16 to 18 rows of deep, juicy, good quality golden kernels. Stalks 8 to 9 feet tall, sturdy and vigorous; free from suckers and dark green. Matures in 85 to 90 days. Seed treated with Power Pak.			

STANLEY'S CROW REPELLENT

1/2 Pint (1 bus.)	\$.60	Pint (2 bus.)	\$1.00
Quart (4 bus.)	\$1.75		

CUCUMBER

1 oz. will plant 50 hills, 2 lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Ace	\$.30	\$.90	\$ 2.75
Color deep green. Fruits uniform, nearly cylindrical, slightly tapered at the ends, 8 to 9 inches long, 2 to 2 1/2 inches thick. Attractive in appearance and holds its color well. 65 days.			
Chicago Pickling25	.75	2.50
Fruits medium green, nearly square ended; very prolific; well worted and ribbed at pickle size. If fruit is left on vines, will develop to 6 1/2 inches long and 2 1/2 inches thick. 59 days.			
Early Fortune25	.75	2.50
Fruits dark green, color retained a long time after harvest, 8 to 9 inches long, 2 1/2 inches thick, only slightly tapered and very uniform. 66 days.			
Hybrid25	.75	2.50
An early variety. Fruits dark green with lighter strips at blossom end, 8 1/2 to 9 inches long; 2 1/2 inches thick, fairly prolific. Excellent picking sort if picked when young. 62 days.			
Marketer30	.90	2.75
An excellent market variety, unusually trim appearance and uniform. Fruits very dark green, cylindrical, slightly tapered at the ends, 8 inches long 2 1/4 inches thick. Seed area exceptionally small. Vines very vigorous and yields heavily through a long bearing season. 60 days.			
Straight 830	.90	2.75
Fruits about 8 inches in length, 1 1/2 to 2 inches in diameter, uniformly cylindrical with rounded ends, deep green and free from objectionable light stripping or tipping. An attractive variety. 64 days.			

DANDELION

1 oz. will plant 150 ft. row, 5 lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Arlington Thick Leaf	\$.75	\$ 2.25	\$ 7.50
Plants form a 20 inch rosette of large broad leaves, thick and easily blanched.			

ENDIVE

1 oz. will plant 150 ft row, 4 to 5 bs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Full Heart Batavian	\$.20	\$.60	\$ 2.00
Also known as Escarolle. Plant medium large, very deep, of upright growth, with a dense mass of thick, slightly crumpled leaves strongly bunched to give a well blanched heart. An excellent market garden strain. 71 days.			
Green Curled, Pink Rib20	.60	2.00
A large late, vigorous sort. Plant medium green with curly, deeply cut leaves. The crowded foilage, dense at the center, readily blanches itself. The mid-ribs or leaf stem is tinged with rose. Also known as chicory in local markets. 76 days.			
Green Curled, White Rib20	.60	2.00
Plant large 18 inches in diameter, tufty and full center. Leaves have deeply cut margins and curly. Mid rib is pale green, thick, tender and fleshy. Heart blanches well in late summer and fall. 76 days.			

DILL

1 oz. will sow a 200 ft. row. 5 lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.	10 lbs.
Long Island Mammoth15	\$.40	\$1.25	\$10.00

Leaves and seed clusters are used in pickles, preserves, soups and sauces. Plant about 2 to 3 feet tall. Seed clusters form in about 70 days.

EGG PLANT1 oz. will produce 1000 plants. $1\frac{1}{2}$ lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Black Beauty	\$.90	\$2.50	\$ 9.00

Plants thrifty 24 to 28 inches tall, commonly bear 4 to 6 large fruits per plant. They are smooth, broad, egg-shaped, uniform, very rich dark purple, retaining color a long time. Matures fruit 80 days after plants are set in the field.

Florida High Bush90	2.50	9.00
--------------------------------	-----	------	------

A hardy variety showing resistance to drought and root rot. Plants 32 inches tall, upstanding, holding fruits off the ground. Fruits 9 to 10 inches long $5\frac{1}{2}$ to $6\frac{1}{2}$ inches diameter, nearly egg shaped, broadest near blossom end. Color deep purplish black and high gloss. 85 days after setting plants in field.

FENNEL

1 oz. will plant 75 ft. row. 8 to 10 lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Florence (Finocchio)	\$.30	\$.85	\$ 3.00

Plant 2 to 3 feet tall, with broad overlapping stalks similar to celery stalks but forming a flat-oval, bulb-like enlargement at the base of the stem.

KALE1 oz. will plant 500 ft. row, $1\frac{1}{4}$ lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Dwarf Curled Scotch	\$.30	\$.85	\$ 3.00

Plant has wide-spreading, finely curled blue-green plume-like leaves. Very hardy and uniform. Grown for use as greens. 55 days.

KOHLRABI

1 oz. will plant 200 ft. row. 4 lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Early White Vienna Short Leaf	\$.30	\$.85	\$ 3.00

Produces bulbs $2\frac{1}{2}$ inches in diameter 55 to 60 days after seed is sown out of doors. Plants small, leaves medium green. Bulbs flattened globe-shape, pale green, used when 2 to $2\frac{1}{2}$ inches in diameter, but grow much larger, interior white, mild, crisp and tender.

LEEK

1 oz. will plant 200 ft. row. 4 to 5 lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
American Flag	\$.50	\$1.50	\$ 5.00

Early variety with long, thick, well-blanchd white stems; leaves large medium blue-green. 150 days from seed.

Musselburgh50	1.50	5.00
--------------------------	-----	------	------

Long white stem with blue-green leaves, longer than American Flag. Can stand over winter when climate is not too severe. 150 days.

LETTUCE

1 oz. will sow 150 ft. row. 1 1/2 to 3 lbs. per acre.

ICEBERG HEADING VARIETIES

	1 oz.	1/4 lb.	1 lb.	10 lbs.
Cornell or Imperial 456	\$.60	\$1.75	\$5.50	\$50.00

Developed by the U. S. Department of Agriculture and Cornell Experiment Station from same breeding material as Great Lakes. Frame and head slightly smaller than Great Lakes, solid, medium green, rather prominent ribs. Has proved a very sure header in the East. Particularly adapted for growing on muck soils. Resistant to tip-burn and early bolting. Used locally for field sowing and late transplanting. 82 days.

Great Lakes60	1.75	5.50	50.00
--------------------------	------------	-------------	-------------	--------------

Developed at Michigan State College from a cross made by the U. S. Department of Agriculture. One of the most satisfactory strains of the Iceberg types for the East. Plant large and vigorous; head large, firm, outer leaves very dark green, blistered, well-folded with tendency to heavy mid-rib. Slow-bolting, shows considerable resistance to tip burn and stands up well in hot weather. 82 days.

Imperial 4435	1.00	3.50	33.00
--------------------------	------------	-------------	-------------	--------------

Developed from Imperial No. 152 for eastern conditions. Foliage dark green, head leaves long and well-wrapped forming firm, slightly flattened heads, excellent quality, weighing 1 1/2 to 2 pounds. Somewhat resistant to tip burn and stands up well in hot weather. Very good for early transplanting. 80 days.

Imperial 847 (Black Seeded Iceberg)35	1.00	3.50	33.00
---	------------	-------------	-------------	--------------

Black seeded. Originally developed as a brown-blight-resistant variety for California, now popular in East and South as a market garden and shipping variety. Leaves smooth, thick, medium light green. Heads medium large, crisp, round, well-folded and firm. 83 days.

Pennlake60	1.75	6.00	55.00
-----------------------	------------	-------------	-------------	--------------

Developed at Pennsylvania Experiment Station from a cross of Great Lakes and Imperial 847. Head medium large and compact; outer leaves dark green, slightly crumpled, well folded, less finely cut edges than Great Lakes; comparatively free from objectionable ribbiness but equally solid and resistant to tip burn. Interior crisp and firm. Appears to be a very good variety for early and late spring planting. 83 days.

Progress (2428)60	1.75	6.00	55.00
------------------------------	------------	-------------	-------------	--------------

Developed by the U. S. Department of Agriculture and the New Jersey Experiment Station from a cross of Imperial 44 with an unnamed hybrid seeding. Heads are early, medium size, compact, dark green, thick-leaved, heavily savoyed with edges more cut and waved than Imperial 44. It matures same time as Imperial 44 but is more resistant to tip burn. Slow bolting, good flavor and excellent quality. 80 days.

Premier or Early Great Lakes60	1.75	6.00	55.00
---	------------	-------------	-------------	--------------

Developed from an individual plant selection of Great Lakes at Pennsylvania State College. The single plant was selected for earliness, smoothness, lack of ribbiness and uniformity of heading. Heads solid, practically round, up to 7 inches in diameter and two pounds in weight. Slow to bolt and very resistant to tip burn. 7 to 10 days earlier than regular Great Lakes. 75 days.

New York PW 5535	1.00	3.50	33.00
-----------------------------	------------	-------------	-------------	--------------

A very early New York type, of compact growth, medium size, with small core and showing remarkable resistance to tip burn. Its chief claim for wide favor seems to be its extreme earliness in the crisp leaf class. Compared with Imperial 44 it is a week earlier, smaller, of better quality, more solid, somewhat quicker to bolt.

Lettuce continued next page

LETTUCE

1 oz. will sow 150 ft. row. 1 1/2 to 3 lbs. per acre.

BOSTON HEADING VARIETIES

	1 oz.	1/4 lb.	1 lb.	10 lbs.
Big Boston	\$.20	\$.60	\$2.00	\$18.00
Heads large and compact, with creamy yellow heart. Leaves broad, glossy, light green, wavy at the edge, which is slightly tinged with reddish brown. Heads firm, well folded of excellent quality having a large frame. 76 days.				
White Boston20	.65	2.25	20.00
The best strain of the butter head type. Frame not as large as Big Boston. Practically free from tip burn and bottom rot. Will hold several days in field after maturity before bolting to seed. Plant and leaves entirely light green; heart buttery and yellow. 76 days.				

LOOSE LEAVED VARIETIES

	1 oz.	1/4 lb.	1 lb.	10 lbs.
Early Curled Simpson	\$.20	\$.60	\$2.00	\$18.00
Early very hardy and dependable; particularly popular for home gardens. Plant large, compact, bright light lustrous green; leaves broad, frilled, firm, crisp, sweet and of good quality. 45 days.				
Grand Rapids20	.60	2.00	18.00
Very early. Plants large, upright, compact; leaves bright light green, large broad, margined much waved and frilled; very tender and sweet. 42 days.				

ROMAINE LETTUCE

	1 oz.	1/4 lb.	1 lb.	10 lbs.
Paris White Cos	\$.20	\$.60	\$2.00	\$18.00
Plants medium large upright, cylindrical, medium green self folding leaves forming a compact head. Heads 8 to 9 inches tall, firm and crisp with greenish-white interior. 66 days.				
Dark Green Cos20	.60	2.00	18.00
A very hardy, medium large, dark green variety which forms a good size, firm, well folded head. 66 days.				

MUSKMELON

1 oz. will plant 100 hills. 2 1/2 lbs. per acre.

	1 oz.	1/4 lb.	1 lb.
Benders Surprise	\$.25	\$.75	\$ 2.50
Excellent home and market garden variety. Fruit 7 1/2 inches long 6 inches diameter slightly oval; skin light yellow when mature, slightly ribbed with irregular patches of netting; flesh thick, bright salmon; very juicy, sweet and good rich flavor. 87 days.			
Hearts of Gold25	.75	2.50
A popular mid-season variety. Fruit 6 1/2 inches long; 5 1/2 inches diameter, slightly oval, distinctly ribbed, abundant fine gray netting over a dark green background, flesh thick, deep salmon color, sweet and juicy. 95 days.			
Hales Best25	.75	2.50
A remarkable large early melon of the Rocky Ford type. Fruits are oval, slightly ribbed and heavily netted; the salmon flesh is very thick and of fine flavor. 80 days.			

MUSTARD

1 oz. will plant 200 ft. row. 5 lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.	10 lbs.
Fordhook Fancy	\$.15	\$.35	\$1.00	\$ 9.00

A handsome, upright growing, mild variety, bright green, plume-like, deeply fringed and cut on the edges. Grown for greens. 50 days.

Southern Giant Curled15	.35	1.00	9.00
------------------------------------	-----	-----	------	------

Very hardy and early; most popular for greens. Leaves large and wide, bright green and very curly on the edges. Plant although spreading, is quite upright in growth. Does not bolt to seed as quickly as Fordhook Fancy. 40 days.

ONION

1 oz. will plant 200 ft. row. 4 to 6 lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.	10 lbs.
Early Yellow Globe	\$.40	\$1.25	\$4.00	\$37.50

A full globe shape onion of rich deep yellow color. Exceptionally good keeper which will hold up in storage better than most early sorts. Vigorous grower and heavy yielder and matures at least two weeks earlier than Southport Yellow Globe. Bulbs medium large, globe to flattened globe, skin tough, rich deep yellow; flesh firm and white. 98 days.

Brigham Yellow Globe40	1.25	4.00	37.50
-----------------------------------	-----	------	------	-------

A selection of Southport Yellow Globe for thick skin and good keeping qualities. Does especially well on muck soil in the North. Excellent storage variety. Bulbs very solid, medium large, deep globe shape; skin dark orange yellow, thick and tough. Does not yield as heavily as Early Yellow Globe. 110 days.

Ebenezer35	1.00	3.50	33.00
-----------------------	-----	------	------	-------

One of the most hardy and best keeping varieties, grown chiefly for sets. The matured bulbs are large, somewhat flattened, deep orange skin; flesh white of mild flavor. 100 days.

Southport Red Globe40	1.25	4.00	37.50
----------------------------------	-----	------	------	-------

Standard late red variety; splendid keeper. Bulbs medium large, deep globe-shaped, small neck, thick skin, very deep purplish-red; flesh fine-grained, white with faint tinge of pink; flavor strong. 110 days.

Southport White Globe40	1.25	4.00	38.00
------------------------------------	-----	------	------	-------

Standard late white variety of highest quality. Bulbs medium large, globe shaped, firm; skin pure clear white; flesh clear white and fairly mild. Best keeper of the white onions. 110 days. Also used for green bunching during summer when small bulbs are desired.

Sweet Spanish50	1.75	5.25	50.00
----------------------------	-----	------	------	-------

Utah strain. The best of the very large, mild slicing varieties. Bulbs large, deep-globe shape small neck; skin deep amber-orange flesh white, fine-grained, mild flavored. Keeping quality fair. 115 days.

White Portugal or Silver Skin40	1.25	4.00	37.50
--	-----	------	------	-------

Most widely used white onion for sets, pickling onions, and mature bulbs and for bunching onions where small bulbs are desired. Bulbs medium size, flat, but fairly deep; skin clear white; flesh white, firm, fine-grained and mild. A splendid keeper. 100 days.

Oriental or Evergreen White Bunching40	1.25	4.00	35.00
---	-----	------	------	-------

The best straight or non-bulbing bunching onion. Produces a cluster of 4 to 6 marketable plants from a single seed in the first season, therefore seed should not be sown too thick. Plants are ready for market in about 60 days; the silvery-white bottoms are often 6 inches long and $1\frac{1}{2}$ to $3\frac{1}{4}$ inches in diameter. Plants are hardy and can be wintered over.

OKRA or GUMBO

1 oz. will plant 50 ft. 6 lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Dwarf Green	\$.15	\$.45	\$ 1.50
Plants 2 1/2 to 3 feet tall, sturdy, well branched. Pod 7 inches long, slender, ribbed dark green. 50 days.			
Perkins Long Pod15	.45	1.50
Plant 5 feet tall, upright; foliage heavy, productive. Pod 7 to 8 inches long, tapered, ribbed, bright green, fleshy. 55 days.			

PARSLEY

1 oz. will plant 200 ft. row. 5 lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.	10 lbs.
Triple Curled	\$.20	\$.40	\$ 1.25	\$ 11.50
Plant compact, vigorous and productive. Leaves very dark green and so finely cut and closely curled they resemble tufts of moss. Excellent for flavoring, garnishing and culinary decoration. 70 days.				
Plain or Italian20	.40	1.25	11.50
The standard variety of plain parsley. Used largely for flavoring. Leaves dark green, deeply cut, flat, but not curled. 72 days.				
Hamburg Rooted (Hymicha)20	.40	1.25	11.50
Locally known as "Hymicha." Forms fleshy roots resembling parsnips, 8 to 10 inches long and similar to celeriac in flavor. Leaves plain deeply cut, stems coarse and tough. Used for flavoring soups and stews. 90 days to maturity.				

PARSNIP

1 oz. will plant 250 ft. row. 6 lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.	10 lbs.
All American	\$.20	\$.40	\$ 1.25	\$ 10.00
An improved variety of considerable merit. Selected for whiter color and slightly more length. Root 12 to 14 inches long, 3 inches thick at the shoulder, tapering gradually to the tip, smooth and decided hollow-crowned, flesh white and tender. 95 days.				
Hollow Crown20	.40	1.25	10.00
Roots 10 to 12 inches long, 2 1/2 to 3 inches thick at the shoulder, hollow-crowned, uniformly tapered to the tip, quite smooth; flesh white and tender. 95 days.				

PEAS

1 lb. will plant 100 ft. row. 2 bus. per acre.

	1 lb.	10 lbs.	1 bus. 56 lbs.
Gradus or Prosperity	\$.50	\$ 3.50	\$ 14.75
Early large podded variety. Height 3 ft. Pods 3 3/4 inches long, semi-round, straight, slightly curved at the tip and pointed, containing 6 to 8 large, sweet green peas.			
Laxtons Progress50	3.75	15.50
The earliest large podded dwarf pea. Vines 18 to 20 inches tall, dark green and prolific. Pods 4 inches long, broad and pointed, deep green, containing 8 large, dark green peas of splendid quality.			
Worlds Record50	3.50	14.75
An improved type of Gradus, being slightly earlier, more dwarf, true to type and productiveness. Height 2 1/2 feet.			
Telephone45	3.25	12.75
A standard high quality, large podded pea. Height 4 1/2 ft. Pod 4 1/2 in. long, medium green, straight, broad and pointed, containing 8 large green peas.			
Dwarf Grey Sugar (Edible Pods)55	4.25	19.00
Height 3 ft. Pods light green, 2 1/2 in. long, 1/2 in. broad, square ended containing 7 light green peas.			

PEPPER

1 oz. will produce 1500 plants. 1/2 lbs. per acre.

Maturity dates indicate approximate time required from setting plants into the field to the production of marketable green peppers. Allow 6 to 8 weeks to produce young plants.

	1 oz.	1/4 lb.	1 lb.
California Wonder	\$.80	\$2.25	\$ 8.00
Plant thrify upright heavily productive over a long season. Fruits very large smooth and regular; commonly 4 1/2 in. long and 3 1/2 to 4 in. through; deep green turning bright crimson; flesh extremely thick and firm sweet flavor. 75 days.			
Oakview Wonder80	2.25	8.00
An outstanding pepper developed from California Wonder a week earlier and better yielder. The fruits are deep glossy green turning bright crimson slightly smaller but blockier and more symmetrical with thick firm walls and high quality of California Wonder. The plants are more compact and not as tall as the parent strain but much heavier yielder. 63 days.			
Early Giant (Harris)80	2.25	8.00
An early sweet pepper. Plants vigorous, erect, extremely prolific. Fruits large 4 1/2 inches long, 3 1/2 inches through, very slightly tapered; deep green becoming brilliant red. 63 days.			
Large Red Cherry70	2.00	7.00
For use in pickles. Plant vigorous, upright and prolific. Fruits round, about one inch in diameter, smooth, solid, very pungent or hot; color deep green changing to deep scarlet. 82 days.			
Long Red Cayenne70	2.00	7.00
Fruits about 5 inches long and 3/4 inches in diameter at the base often curved and twisted; bright red, hot and pungent. 70 days.			
Sunnybrook or Cheese70	2.00	7.00
Fruits tomato-shaped, 2 inches deep, 3 inches in diameter; smooth glossy dark green turning to deep scarlet red. Flesh thick and sweet. Early and productive. 75 days.			
Worldbeater, No. 13 Mosaic Resistant70	2.00	7.00
Our strain is resistant to mosaic, a disease very prevalent in this section; will yield a crop of peppers when non-resistant strains often fail. Plant vigorous, upright and very productive. Fruits 4-lobed, 5 inches long, 3 1/2 inches in diameter; color glossy green, changing to bright deep red; flesh thick, mild and sweet. 70 days.			

PUMPKIN

1 oz. will plant 25 hills, 3 to 4 lbs. per acre.

	1 oz.	1/4 lb.	1 lb.	10 lbs.
Connecticut Field	\$.15	\$.45	\$1.50	\$14.00
Standard field pumpkin for pies, canning and stock feed. Fruits very large commonly 10 inches long, 12 inches in diameter, weighing 20 pounds, sometimes much larger; skin smooth, deep orange-yellow; shell thin, hard; flesh thick, coarse, sweet and deep yellow. Also known as 'Jack O'Lantern' pumpkin. 120 days.				
Large Cheese (Special Strain)20	.60	2.00	19.00
Our stock is uniform, true to type, dependably early and heavily productive. Fruits large, flattened, commonly 12 to 15 inches in diameter and half as deep; sometimes much larger, furrowed; skin creamy buff; flesh extremely thick, deep salmon-yellow and of good quality. 120 days.				
Small Sugar15	.45	1.50	14.00
Earliest and best for pies. Fruits commonly 6 inches long, 8 to 9 inches diameter; flattened, furrowed, skin smooth, rich reddish-orange; rind hard; flesh thick, orange-yellow of unexcelled quality. 115 days.				

RADISH

2 oz. will plant 100 ft. row. 8 to 10 lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.	10 lbs.
Early Scarlet Globe	\$.15	\$.30	\$.70	\$ 6.50
An excellent market garden strain for early spring or late fall planting. During the warm summer produces too long tops. Roots olive-shaped, skin rich bright scarlet; flesh white, crisp and of splendid quality. 23 days.				
Early Scarlet Globe Short Top15	.30	.80	7.50
A highly colored and very attractive radish bred for greenhouse forcing, growing on muck soil or high ground during the summer. Tops are grey-green and small; roots oblong-globe, slightly longer than broad, very firm and of bright almost true scarlet color. Very popular with market gardeners. 21 days.				
Cherry Belle20	.40	1.10	10.00
Roots are round, tap root small, color bright cherry-red; will remain solid and crisp after all other early radishes have become pithy. Tops are short. Primarily a forcing variety, and not recommended for early spring or late fall planting outside as cool nights and short days tend to retard top growth. 22 days.				
Icicle15	.35	1.00	9.00
The best early white variety. Tops medium short. Roots 4 1/2 to 5 1/2 inches long, slender, tapering at the tips, very white; flesh clear white, brittle, and of mild flavor. 30 days.				
White Strasburg15	.35	1.00	9.00
Roots commonly 5 inches long, 1 1/2 to 2 inches diameter at the shoulder, tapered, smooth and white; flesh firm, crisp and mildly pungent. 40 days.				

Price per 100 lbs. on application

RUTABAGA or SWEDE

1 oz. will plant 100 ft row. 3 lbs. per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Improved American Purple Top	\$.15	\$.35	\$ 1.00
Tops large, vigorous, blue-green. Roots 5 to 6 inches diameter, spherical, skin deep purplish-red above ground, light yellow below; tap root, small; flesh yellow fine-grained, firm, crisp, mild and sweet. Often grown locally for tops as greens. 90 days.			

SALSIFY or OYSTER PLANT

1 oz. will plant 100 ft row. 8 to 10 lbs per acre.

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Mammoth Sandwich Island	\$.40	\$ 1.25	\$ 4.00
A hardy slow growing species; requires all season and is better if frosted. Roots 8 to 9 inches long, 1 to 1 1/2 inches thick, tapering gradually. Top heavy and grass-like.			

SORREL

1 oz. will sow 150 ft. row. 5 to 8 lbs. per acre.

1 oz. ¼ lb. 1 lb.

Narrow Leaved — (Special Strain)

\$1.00 \$3.00 \$10.00

Used in salads and as greens. Sometimes called "Sour Grass" because of its acid taste. Plant perennial, with long, slender, thick, bright green upright leaves with mildly acid flavor. 60 days.

SPINACH

1 oz. will plant 100 ft row. 10 to 12 lbs. per acre.

1 lb. 10 lb. 100 lb.

Bloomsdale Savoy, Dark Green \$.50 \$4.00 \$35.00

Plant very early, hardy, vigorous and rapid growing; has tendency to go quickly to seed in hot weather; leaves medium large, distinctly blistered, "savoyed" and crumpled; thick in texture; rich, deep, medium-dark, glossy, green. For late fall or early spring sowing. 40 days.

Long Standing Savoy50 4.00 35.00

About 3 to 5 days later than Bloomsdale, but will stand two weeks longer before bolting to seed. Plants very uniform; leaves medium large, intensely blistered or savoyed and crumpled, very thick in texture and rich, deep, dark glossy green. An excellent all season spinach. 45 days.

New Summer Long Standing Savoy50 4.00 35.00

A new and improved strain of Long Standing Savoy, distinguished for its darker Green Color. It will stand 3 to 4 days longer without bolting to seed and is remarkably uniform, with a trifle more curl than the parent. 45 days.

Virginia Blight Resistant Savoy50 4.00 35.00

Developed at the Virginia Experiment Station. The fastest growing of the savoy types of spinach; very similar to Bloomsdale Savoy; should only be used for late fall in our section as it is the quickest bolting of all savoy types in warm weather. 40 days.

Old Dominion50 4.00 35.00

A cross of Virginia Blight Resistant Savoy and King of Denmark. Large, dark green, heavily crumpled leaves somewhat pointed. Resistant to mosaic and stands fairly well without bolting; tolerant to cold soil. Used for early fall crop, also late fall sowing for early spring harvest or wintering over. 40 days.

Haarlem Market (Prickly Seeded Savoy)60 4.50 40.00

This variety is earlier, quicker growing and hardier than Bloomsdale Savoy as well as being remarkably resistant to blight. Being hardier than round seeded spinaches, it will stand cold and unfavorable weather.

Spinach Seed Treatment

Growers often have difficulty in securing a good stand of spinach. This is often caused by damping-off of the young plants and may be controlled by treating the seed with Arasan Dust before planting. Use this dust at the rate 4 oz. to 100 pounds of seed.

However this treatment will not prevent young spinach plants from burning off during the hot summer months.

Arasan 8 oz. can \$1.00

SQUASH

SUMMER VARIETIES

3 oz. will plant 100 hills. 3 to 4 lbs per acre.

	1 oz.	¼ lb.	1 lb.	10 lbs.
Cocozelle, Italian Vegetable Marrow	\$.20	\$.50	\$1.60	\$15.00
Fruits straight, almost cylindrical, 16 to 18 inches long and 6 inches diameter at maturity; usually picked for market when 6 to 8 inches long. Color dark green with lighter green stripes; flesh pale greenish white, prolific, early and excellent quality. 60 days to maturity.				
Early Prolific Straightneck (Bush)20	.50	1.60	15.00
A high yielding squash of the Summer Straightneck type. It is earlier and uniformly productive over a long period of time. The fruits are firm and marketable when only 4 or 5 inches long and are excellent when they attain full length of 12 to 14 inches. They are straight, smooth and delicate creamy yellow in color, have no trace of green when very young. 50 days to maturity.				
White Bush Scallop (Bush)20	.45	1.50	14.00
Very early; fruit-flattened and scalloped, about 8 inches in diameter. Comparatively smooth on the surface and creamy-white in color. 68 days to maturity.				
Zucchini (Bush)20	.50	1.60	15.00
Straight, almost cylindrical, 18 inches long, 4 inches diameter, medium green with grayish-green mottling. In best edible condition when 6 to 8 inches long. 65 days to maturity.				

FALL OR WINTER VARIETIES

3 oz. will plant 100 hills. 2 to 3 lbs. per acre.

	1 oz.	¼ lb.	1 lb.	10 lbs.
Blue Hubbard (Running)	\$.20	\$.60	\$2.00	\$19.00
One of the best Hubbards for sweetness, flavor and keeping quality. Fruit 16 inches long, 10 inches diameter, slightly rough and ridged; rind very hard and strong, blue-green color. Flesh orange-yellow, thick, dry and fine grained, sweet. 115 days.				
Warted Hubbard (Running)20	.60	2.00	19.00
Fruit 15 inches long. 10 inches through at widest diameter, densely covered with warts, thick and hard shelled, very dark green. Flesh dark golden-yellow, thick, dry, fine grained, sweet flavored and good quality. Very good yielder and keeps well. 115 days.				
Butternut (Running)20	.60	2.00	19.00
An ideal baking type of highest quality, prolific yielder and good keeper. Fruits 3 to 4 pounds, 8 to 10 inches long, bulbous at the blossom end, pear shaped; rind thin, tough, smooth and creamy yellow color. Flesh, neck end is solid meat, quite dry, light yellow nutty flavor and excellent baking quality. Small seed cavity located in the bulbous blossom end. 100 days.				
Table Queen or Des Moines (Running)20	.45	1.50	14.00
Also known as Acorn. Fruit acorn-shaped, 5 inches long, 4 1/2 inches diameter, pointed at blossom end, ribbed, smooth, thin-shelled. dark greenish-black. Flesh medium thick, pale orange, tender, dry and sweet. 80 days.				
Uconn (Bush)20	.60	2.00	19.00
A bush type of Table Queen developed by Dr. Lawrence C. Curtis. Fruits are practically the same as Table Queen. The outstanding characteristic is, being a bush type, it can be planted much closer.				

TOMATO

The number of days indicated represents the time required from setting of plants to produce marketable fruits.

1 oz. will produce 1500 plants. 1/4 lb. per acre.

	1 oz.	1/4 lb.	1 lb.
Master Marglobe (N. J. State Certified)	\$.65	\$2.00	\$ 6.50
By far the most popular tomato. Plants are strong, robust, with heavy foliage, resistant to Fusarium wilt and nail-head rust, moderately productive. Fruits are deep red, medium large, nearly globular, smooth, solid and with thick walls and cross-sections, making small seed cells. 75 days.			
Rutgers (N. J. State Certified)65	2.00	6.50
Developed by L. G. Schermerhorn of the New Jersey Agricultural Experiment Station, by selection from a cross between Marglobe and J. T. D. The plants are large with thick stems and abundance of vigorous foliage, which protects the fruits from sunscald. The fruits are medium large, similar in shape to Marglobe, but more flattened at the stem. The outer and inner walls are thick with very small seed cavities. Flesh is firm and red throughout. Excellent for green-wrap. 73 days.			
Pritchard or Scarlet Topper90	2.50	9.00
Fruits good size, round, brilliant red in color; thick flesh, firm and with small seed cavities. They color perfectly right up to the top without any green spots and have little tendency to crack. 75 days.			
Valiant	1.00	3.00	10.00
Introduced by Francis C. Stokes Company in 1936. Fruits extra early, large, solid, globe-shaped and of bright scarlet color. Vine upright to partly spreading and dark green. 70 days.			
Valiant (Special Stock Seed)	5.00		
Plant and fruit same as above but seed is from special stock of mother seed.			
Stokesdale65	2.00	6.50
An early variety of Marglobe type, but slightly heavier and maturing a week to ten days earlier. Fruits ripen from the inside out, like Rutgers; quite free from cracking and a remarkably heavy yielder. 73 days.			
Dwarf Champion90	2.50	9.00
A strictly dwarf variety, useful in home gardens where space is limited. Produces excellent plants which are short, heavy, compact, stocky with dark green foliage. Fruits medium size, pinkish purple in color, flattened globe, smooth and solid. Not a commercial variety. 83 days.			
Garden State75	2.25	7.50
Developed by Campbell South Company from crosses involving Pritchard, Marvel and Pink Topper. Plant vigorous, partially resistant to Fusarium Wilt and late blight; fruits slightly flattened globe-shape, attractive in color and size and thick-walled. 84 days.			
Italian Red Plum (Special Strain)	2.50	6.75	25.00
Fruits oval 2 1/2 inches long by 1 1/2 inches in diameter, borne in clusters, elongated, flat-sided, blunt blossom end, two celled, deep red; flesh thick, contains little or no juice, flavor very mild. Plants medium, rather open and very prolific. Used for canning solid pack, tomato paste and puree. 70 days.			

TURNIP

1 oz. will plant 100 ft. rows. 1 to 2 lbs per acre.

	1 oz.	¼ lb.	1 lb.	10 lbs.
Extra Early White Milan	\$.20	\$.45	\$1.50	\$13.50
Best white variety for market garden forcing. Tops small, compact, strap-leaved. Roots medium small, 3 1/2 inches across, flat, entirely white; flesh fine grained, mild and tender. 40 days.				
Extra Early Purple Top Milan20	.45	1.50	13.50
A very early variety of mild flavor. Tops small, strap-leaved. Roots flat, 3 1/2 inches across, purplish-red above ground, white below; flesh white, fine grained, mild and tender. 40 days.				
Purple Top White Globe20	.45	1.50	13.50
An outstanding strain for market gardeners. Tops medium large, compact, erect, dark green and cut-leaved. Roots globular, smooth 4 to 5 inches diameter, intense purplish-red top half with pure white bottom; flesh white, firm, fine-grained and tender. 55 days.				
Improved Golden Ball20	.45	1.50	13.50
The best yellow-fleshed turnip. Tops small and cut-leaved. Roots globular, 3 to 4 inches diameter, smooth, exterior orange-yellow; flesh yellow, firm, fine-grained. Good Keeper. 60 days.				

FOLIAGE TURNIP

	1 oz.	¼ lb.	1 lb.	10 lbs.
Seven Top	\$.20	\$.45	\$1.50	\$13.50
Extremely hardy foliage turnip grown principally for greens. Roots woody, fibrous, tough and inedible; crown sends up numerous leafy shoots which are excellent for greens. Grows rapidly and produces an abundance of tender leaves.				

WATERMELON

1 oz. will plant 30 hills. 3 to 4 lbs per acre.

	1 oz.	¼ lb.	1 lb.
Kleckleys Sweet	\$.15	\$.45	\$ 1.50
A popular garden variety. Fruits 24 inches long, 12 inches diameter large cylindrical shape; skin dark bluish-green; rind thin; flesh bright scarlet, sweet, crisp with no stringiness. Seed creamy white with trace of brown. 85 days.			
Citron, Red Seeded15	.45	1.50
Most popular for preserves, fruit 6 to 8 inches diameter, nearly round; skin is alternating light and dark green striped; flesh solid white and not edible in raw state. Seeds smooth red. 90 to 95 days.			

We carry a full line of farm tools and repair parts, some of which are listed below. We request you to write us for information and prices on the particular tools or repair parts in which you are interested.
